1. Introduction

PRO-ENERGY is a transnational cooperation project, co-financed by the Cooperation Programme "Interreg V-B Balkan Mediterranean 2014-2020", under Priority Axis 2, Specific Objective 2.2 Sustainable Territories. The project aims at promoting Energy Efficiency in public buildings in the Balkan Mediterranean territory and to create a practical framework of modelling and implementing energy investments interventions, through specific ICT monitoring and control systems, as well as through energy performance contracting (EPC). The specific objective of PRO-ENERGY is to reduce by more than 20% the energy spending in public buildings of the participating entities in one year after the implementation of pilot actions.

Based on the above, Work Package 1 (WP 1) "Project Management and Coordination" aims to support the Regional Unit of Thesprotia in monitoring and implementation of the physical and financial progress of the project in terms of the programmed activities and actions, as well as the administrative, financial and technical management of the project, through the preparation of appropriate progress reports according to the specifications, guides and tools of the Program Interreg V-B Balkan Mediterranean 2014-2020.

Specifically, action 1.3 "Management and Coordination" includes the support in the drafting of reports, in the financial control of the project and in certification of expenses during audits.

This deliverable is the third Project Progress Report (D.1.1.3.c), that is the contribution to the 3rd Progress report that was submitted for the second semester of 2020. The deliverable also includes the paid-out expenditure that was declared during this period via MIS, that is similar to the previous one. No verification took place on behalf of the Regional Unit of Thesprotia. Thesprotia shall be contributing to the 4th Project progress report for the first semester of 2021, that will be submitted in July. During the next period Thesprotia intends to submit additional paid out expenses on the MIS to be verified and certified within the month of July.

TREK DEVELOPMENT SA Page 6 of 19

2. 3rd Progress report - 3rd Progress report of the Regional Unit of Thesprotia

The current deliverable is the 3rd Progress report of the Regional Unit of Thesprotia that contributed to the 3rd Progress report of the project for the second semester of 2020. More specifically:

• The third progress report of the project was submitted via the MIS on 31/01/2020 for the period 31/07/2020 until 31/12/2020.

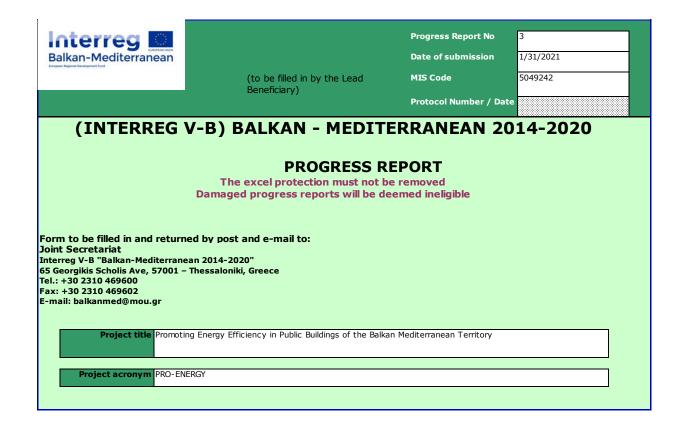

During the period of reference, between 01/03/2021 is $\omega \zeta = 30/06/2021$, two meetings between partners: one on 06/04/21 in order to discuss specific technical issues among the partners in relation to the development of the activities under WP3 and WP4, and the 3^{rd} Project meeting that took place online on 27/05/2021. This meeting aimed at evaluating the progress (physical and financial) of the project as well as to discuss for future actions including the request for possible changes in the budget as well as the extension of the project until the end of the year, on 31/12/2021. The Regional Unit of Thesprotia (RUT) with the support of the consultant managed to complete the pending activities under the WP3: the Joint strategy and action plan for increasing energy efficiency through behavioural change, the Joint criteria for selecting pilot public buildings and the Energy audits in pilot public buildings. RUT also participated in the online survey for the identification of trainees and training needs and completed this deliverable as well as the training material under 4.2 as per study guide that was prepared by the WP4 coordinator. Relevant details with regard to the physical and economic progress shall be included in the 4^{th} Progress report for the first semester of 2021 that Thesprotia shall be contributing to and will be submitting in July.

The following pages present the 3rd Progress report.

The paid-out expenditure that was declared via MIS during this period is the same to the one mentioned in the 2nd Progress report since Thesprotia did not have paid out expenses. The next period Thesprotia shall be uploading additional paid out expenses amounting to 53.134 euro to be certified within July. No verification and certification took place on behalf of the Regional Unit of Thesprotia. The total verified amount within July is estimated to be equal to 68.168,40 euro. During the previous period RUT also signed the contract with the FLC, who will verify and certify the amount mentioned within the next period.

There have been several delays since the beginning of the project further affected by the emergence of COVID-19 pandemic. In autumn 2020, LP and PP2 signed the contract with the external expertise. With regard to WP1 activities, partners met at the Kick-off meeting in 30.01.20 in Igournenitsa. The second project meeting took place in December 2020 via web means (zoom), organised by the LP, supported by the technical consultant. During this meeting the issue of the absense of Albanian partner was also discussed and the decision was taken to proceed with an official communication via 15 in order to resolve the issue the best possible way. Progress has been made in relation to WP2 and specifically the finalisation of the project identity, and the project logo. The coordinator of this WP has also developed actions related to the website and communication plan to be finalised in the first semester of 2021.

With regard to WP3, CEA has assigned an external expert for the development and contribution of developing the deliverables of WP3 and First level controller through the procurement process. The external energy expert on behalf of CEA and with the contribution of EMS, delivered the deliverables 03.3.1 & D3.3.2 that were finalised by partners. Moreover, there was a contribution from the energy expert for the development of D3.3.3 & D3.3.4. PP5 is involved in implementation of the project through the appointed RDA working team under the project in accordance with the labour legislation. Achievements have been noted in all WPs including WP4 with the initial work on the identification of trainees

Summary of the project's achievements during this reporting period

e describe the main achievements during this period The maximum total number of characters is 1500

The period of July-December 2020, even though it was difficult due to COVID, and the absence of the Albanian partner, the consortium managed to proceed with the first deliverables of the WP3. Specifically, the deliverables submitted by all partners expect the Albanian's in December. This problem delayed the synthesis report of into deliverables and the template activity's development about Joint Strategy and Framework. CEA also developed the templates for the D3.3.3 Joint Strategy and Framework and D3.3.4 Joint Criteria for the selection of the pilot buildings. In auturn 2020, LP and PP2 signed the contract with the external expertise. The second project meeting took place in December 2020 via web means, organised by the LP, supported by the technical consultant. During this meeting the issue of the absense of Albanian partner was also discussed and the decision was taken to proceed with an official communication via JS in order to resolve the issue the best possible way. Progress has been made in relation to WP2 and specifically the finalisation of the project identity and the project logo. The coordinator of this WP has also developed actions related to the website and communication plan to be finalised in the first semester of 2021. CEA presented the template for activity 3.4 and confirmed that stakeholders analysis will be similar for PP4.

Analytical description of the implemented actions, outputs and results during this reporting period with reference per work package and Beneficiarys ' involvement.

The maximum total number of characters is 4000

(please do not exceed 1000 characters in each box)

LP signed the contract with the external expert in November 2020. During this period, the LP has managed to finalise the actitvities in relation to the Indicators system and quality assurance system. Also in December 2020, with the support of the technical consulant he organised the 2nd project meeting in order to discuss the issue of the anbsence of the Albanian partner. The PO was also present during the meeting providing valid instructions in this regard. Following that it was decided that an official communication will be sent to the Albanian Ministry via the JS. New timeframes were set for all WPs for the next period. The partner contributed for the finalisation of 3.1 and 3.2.

PP2 signed the contract with the external expert in September 2020. During this period the partner contributed to the finalisation of the project identity as well as the project logo. The website and communication plan are planned to be finalised during the first semester of 2021. The partner contributed for the finalisation of deliberables related to WP1 and WP3 as coordinated by the project partners. CEA, PP3 participated in the 2nd online project meeting with the view to discussing the development on a number of activities under all WPs. It further contributed for the development of the Communication plan, with the completion of the template Stakeholder's Analysis. CEA & EMS developed the same template and the budget for this WP will be claimed on the next financial report. CEA also declared expenses on staff cost of the realisation of activities under WP3 and signed contracts for external expertise for activities 3.1, 3.2 and 3.3.

PP4 has contributed with the coordination of PP3 to the stakeholders analysis as well as the deliverables 3.1 and 3.2. EMS continued to implement the activities regarding of the WP4: Capacity Building for Energy Managers. The consortium faced difficulties with the procurements regarding the external experts. In addition, due to COVID situation, there were delays in delivering the deliverables according to the time plan. The first draft of the deliverable D4.4.1 Identification of trainee's assessment of training needs will be submitted as agreed to the 2nd online meeting by the end of January 2021. With regard to PP5 RDA team members participated in a training under the project "Organizing and conducting trainings for energy managers on energy efficiency management and BDS EN ISO 50001 in industrial enterprises, incl.

SMEs, under the project "Increasing the capacity of SEDA for planning policies and measures for energy efficiency. Raising the awareness of Bulgarian enterprises about the potential for energy savings". PP5 has also contributed to the finalisation of all the abovementioned deliverables. Communication and dissemination activities: Publications in Bulgarian and English on RDA website www.rda-bg.org and RDA Facebook page.
Communication with relevant stakeholders, Sustainable Energy Development Agency, Regional Administrations, Municipalities of Plovdiv Region and South Central Planning region. RDA PRO-ENERGY 1ST NEWSLETTER disseminated. First draft of the Joint criteria for selecting pilot public buildings

The next steps to be taken for project's implementation is complete all tasks of WP3 as follows:
Contribution of all partners to the Joint Strategy and Action Plan for increasing energy efficiency through behavioural change
Contribution of all partners to the definition of the joint criteria for selecting pilot public buildings

Planning, coordination and implementation of the energy audits in the pilot public building of RDA selected, including the installation of smart meters

lasks from WP2
Development of the partner's contribution to the web site and social media pages and their enrichment with content including translations of content
Design, and production of printed material (production of 500 BG project brochures, translations of all brochures, production of 500 BG-EN bilingual joint strategy
brochures and 500 BG-EN bilingual joint platform brochures, banners)
Participation in partnership events
WP4 tasks include:

Identification of trainees that will participate in the training sessions (seminars, webinars etc.) and

Development of the training curricula and material on energy related topics (contribution)

Training seminars Training evaluation

PB4, EMS: Create and publish all the tender documents for awarding to all consultant teams to fulfill the requirements of the external expertise and services required in the Work Packages 1,2,3,4 and 5.

Problems encountered and proposed solutions

During this period we continue to suffer limitations due to COVID 19 epidemic - Lockdowns in partners'countries. One of the most important issues that the consortium still faces is the absence of the Albanian partner that is planned to be settled the earliest the first semester of 2021. Another problem of the previous period were the delays in the procurement process for the external experts encountered by the Greek partners. This was settled with the finalisation of the subcontructing process in autumn of the same year with the external expert. Due to the delays caused by all the above, it was decided that timeframes will be transferred accordingly in order to provide partners for sufficient time to implement pending activities in the most efficient way.

Changes in the Implementation

Please state if you consider making any modifications of the approved Application Form. The project implementation must strictly follow the implementation plan of the approved Application Form. Under no circumstances changes should be made without the knowledge and approval of the Managing Authority while important changes may require the submission of a revised application form. Furthermore, important changes/modifications of the project may require the approval of the programme Monitoring Committee. Please follow the instructions provided in the Project Manual as in force.

The maximum total number of characters is 1500

Number of characters 380

Against the background that was described above, all the deliverables will need to be rescheduled—the project coordinator suggested the proposed extension of the deadlines. During the meeting as suggested and agreed in communication with the PO, the LP will need to submit a request for a minor modification of the AF in order to include the updated timeframes as set by the SC.
