

Project partners

PRO-ENERGY is the outcome of joint forces of project's participating territories to address common challenges that currently result in high energy consumption and CO2 emissions. Three national authorities, two development agencies and one energy agency from Greece, Cyprus, Bulgaria and Albania have collaborated in this regard, bringing complementary skills that are important in achieving the objectives set. Project partners are: i) Region of Epirus - Regional Unit of Thesprotia, Greece (Lead Partner), ii) Development Agency of Evia, Greece, iii) Cyprus Energy Agency, Cyprus, iv) Department of Electrical and Mechanical services - Ministry of Transport, Communications and Works Cyprus, v) Regional Development Agency with Business Support Centre for Small and Medium-sized Enterprises, Bulgaria and vi) Ministry of Infrastructure and Energy, Albania.
